MARKET & REGULATORY RESEARCH · CASE STUDY

Africa Stablecoin Intelligence: Market & Policy Tracker

BI Scientist • AI/ML Engineer • Python Developer

Research platform bringing stablecoin market data, country-by-country regulatory tracking and editorial publishing into one place. Deployment pending verification.

MARKET FRAGMENTATION

Africa's Currency Volatility & Stablecoin Surge

Businesses across Africa use stablecoins for payments and treasury, but the data is scattered across circulars, explorers and global reports.

Parallel FX Gaps

- Official bank exchange rates diverge significantly from parallel market reality.
- Stablecoins (USDT, USDC, cNGN) serve as real-time pricing benchmarks.
- Lack of aggregated visibility into actual liquidity premiums.

Fragmented Frameworks

- Policies vary from progressive regulatory sandboxes to complete bank bans.
- Multinational fintechs face severe legal uncertainty across borders.
- Regulatory changes occur abruptly without structured tracking.

Cross-Border Settlement

- Correspondent banking makes intra-African payments slow and costly.
- Stablecoin rails are one alternative being tested.
- Need macro data to inform institutional market entry.

DATA ARCHITECTURE

Market Metrics, Country Profiles & Editorial CMS

Every metric shows its source and timestamp.

Market Metrics

- Scheduled ingest from public market and on-chain APIs.
- Stablecoin market cap and corridor indicators.
- Source and timestamp on every figure.

Country Profiles

- Central bank and securities-regulator positions.
- Per-country pages linked to sources.
- Maintained by the research team.

Editorial Admin

- Draft, edit, schedule and publish articles.
- Homepage highlights and newsletter.
- Light, dark and system themes.

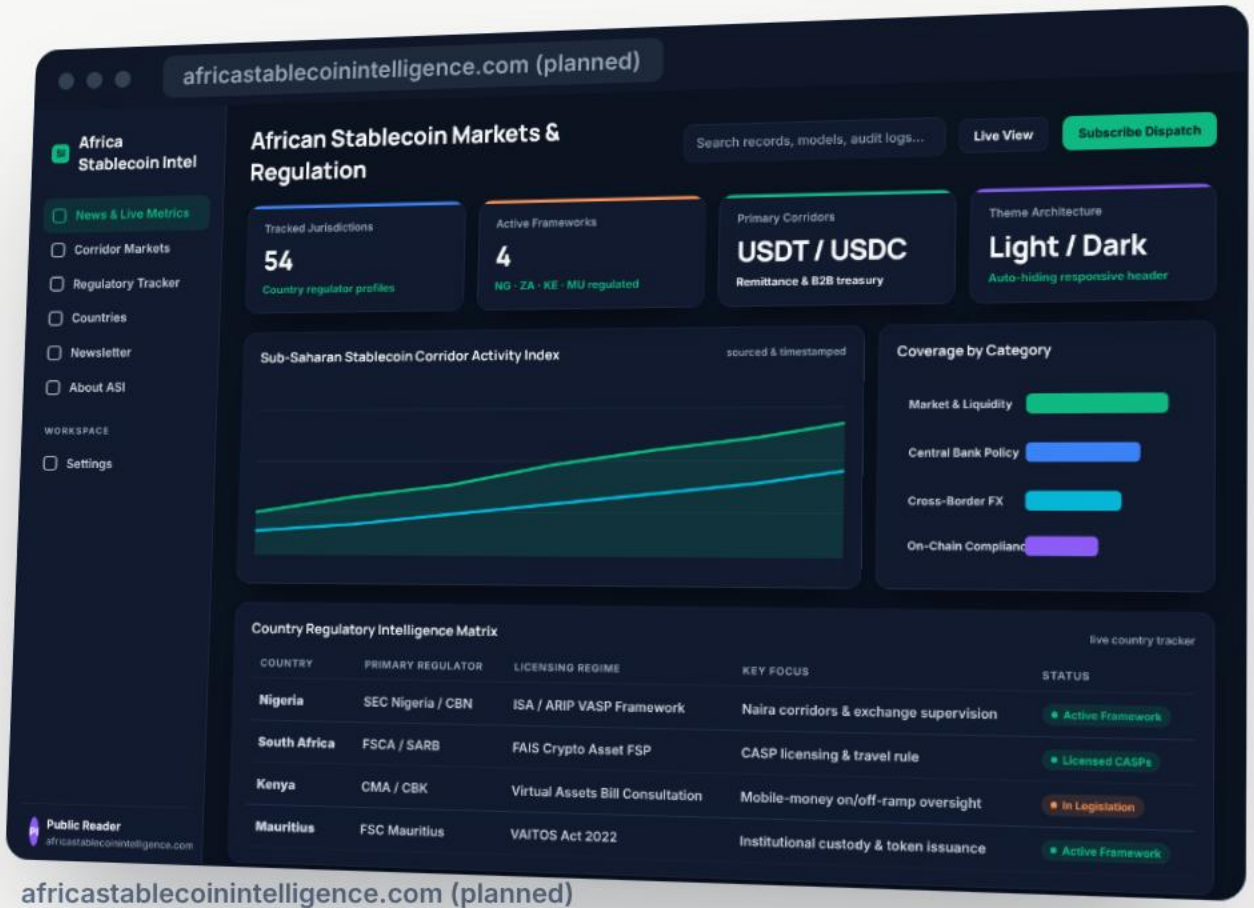

INTELLIGENCE INTERFACE

Public Site & Research Pages

Home, markets, regulation and country views (pre-launch build).

- **Markets View:** Stablecoin market and corridor indicators, each with its data source.
- **Regulation & Countries:** Country-by-country summaries of regulator positions.
- **Editorial Workflow:** Research team publishes dispatches from a separate admin panel.

Who It Is For

- Fintech and treasury teams entering African markets.
- Researchers comparing regulator positions across countries.
- Readers of the newsletter and dispatches.

My Part

- Documented data sources and the market schema.
- Theme system, mobile navigation and header for both apps.
- Deployment variables, runbooks and Search Console setup.

CASE STUDY TAKEAWAY

Market signal and regulation, side by side.

Africa Stablecoin Intelligence keeps market data and policy tracking in one place, with sources shown.
